

RESEARCH INTERESTS

My research lies at the intersection of machine learning and robotics, with a particular emphasis on environmental monitoring and autonomous systems. I develop algorithms for sensor placement and informative path planning, with current work focusing on enabling autonomous underwater vehicles to perform efficient inspection and monitoring tasks in challenging marine environments.

Keywords: Informative path planning, sensor placement, marine robotics, Bayesian learning

RESEARCH EXPERIENCE

Postdoctoral Researcher, Texas A&M University

Oct 2024—Present

Designing path planning algorithms for autonomous underwater vehicles to enable efficient infrastructure inspection in marine environments.

Bayesian Sensor Placement and Informative Path Planning

May 2020—Sep 2024

Developed efficient methods for sensor placement and informative path planning in both continuous and discrete domains. Achieved solutions at least an order of magnitude faster than prior state of the art, enabling real-time deployment on resource-constrained robots.

Research Intern, GE Research

May 2023—Aug 2023

Created a low size, weight, and power-optimized Bayesian framework to explain and justify predictions of pre-trained deep neural networks.

Pose Estimation and Action Recognition with mmWave Radar

May 2019—May 2020

Designed and evaluated deep learning models for human pose estimation and activity recognition using mmWave radar data.

User Recognition with WiFi and mmWave Radar

Jan 2018—May 2020

Developed deep learning algorithms for gait-based user identification using signals from WiFi routers and mmWave radars.

EDUCATION

Ph.D. in Computer Science, University of North Carolina at Charlotte Concentration: Machine Learning and Robotics Thesis: Efficient Bayesian Sensor Placement and Informative Path Planning Advisor: Dr. Srinivas Akella	Aug 2018—May 2024
M.Sc. in Computer Science, University of North Carolina at Charlotte Concentration: Artificial Intelligence, Robotics, and Gaming GPA: 4.00 / 4.00	Aug 2018—May 2021
B.Sc. in Computer Science, Wichita State University Minor: Mathematics GPA: 3.45 / 4.00	Aug 2014—May 2018

TEACHING EXPERIENCE

Teaching Assistant, University of North Carolina at Charlotte Assisted in teaching and mentoring graduate students in the following courses: <ul style="list-style-type: none">- Machine Learning (ITCS 8156)- Algorithms and Data Structures (ITCS 8114)- Optimization for Machine Learning and Data Science (ITCS 8010)	Jan 2021—May 2024
B.S. Teaching Fellow, Wichita State University Co-instructed, graded, and tutored undergraduate students in the following programming courses: <ul style="list-style-type: none">- Object-Oriented Programming (CS 311)- Data Structures (CS 300)- Introductory C++ Programming (CS 211)	Aug 2016—May 2018

SERVICE/AWARDS

Associate Editor <ul style="list-style-type: none">- IEEE International Conference on Robotics and Automation (ICRA)	Sep 2025—
Reviewer <ul style="list-style-type: none">- IEEE International Conference on Robotics and Automation (ICRA)- IEEE International Conference on Intelligent Robots and Systems (IROS)- IEEE International Symposium on Multi-Robot & Multi-Agent Systems (MRS)- IFAC Conference on Control Applications in Marine Systems, Robotics and Vehicles (CAMS)- International Journal of Robotics Research (IJRR)- IEEE Robotics and Automation Letters (RA-L)- Ocean Engineering	Jan 2022—
UNC Charlotte GSSF Grant Recipient <ul style="list-style-type: none">- Awarded the UNC Charlotte Graduate School’s Summer Fellowship (GSSF) grant	May 2022
Deans Honor Roll <ul style="list-style-type: none">- Recognized for outstanding academic performance by the Dean’s office	May 2018, May 2017, Dec 2016, Dec 2014
Vice President, Association for Computing Machinery (ACM) <ul style="list-style-type: none">- Helped to manage the local chapter of ACM and organized educational events on campus	Aug 2015—Dec 2016
Vice President, Institute of Electrical and Electronics Engineering (IEEE) <ul style="list-style-type: none">- Helped to manage the local chapter of IEEE and organized educational events on campus	Aug 2015—Dec 2016

SKILLS

Programming Languages: Python, C/C++, Matlab, Bash
Libraries & Frameworks: TensorFlow, PyTorch, OpenCV, ROS, Pyro, GPflow, NumPy, JAX
Platforms & Tools: Linux, Docker, Slurm, OpenStack, AWS, Microsoft Azure, Google Cloud Platform (GCP)
