

## RESEARCH INTERESTS

My research lies at the intersection of machine learning and robotics, with a focus on approximate inference (Bayesian learning) and path planning. Currently, I am investigating sparse Gaussian processes to tackle critical issues in robotics. These include generating explainable DNN predictions, sensor placement, multi-robot informative path planning, and robot motion planning.

## RESEARCH EXPERIENCE

### Postdoctoral Researcher at Texas A&M University

Oct 2024—

Developing path planning algorithms for autonomous vehicles to perform infrastructure inspection tasks

### Bayesian Sensor Placement and Informative Path Planning

May 2020—Sep 2024

Researched approaches for efficient sensor placement and informative path planning in continuous and discrete domains. Our approaches were at least an order of magnitude faster than the prior SOTA, thereby enabling real-time deployment on resource-constrained robots

### Explaining, Justifying, and Quantifying Uncertainty of DNNs (Intern at GE Research)

May 2023—Aug 2023

Developed a low size, weight, and power (SWaP)-optimized Bayesian approach to explain black-box pre-trained DNN predictions

### Pose Estimation and Action Recognition with mmWave Radar Devices

May 2019—May 2020

Analyzed and developed deep learning algorithms for pose estimation and action recognition from mmWave radar data

### User Recognition with WiFi Routers and mmWave Radar Devices

Jan 2018—May 2020

Developed deep learning algorithms for gait-based user recognition with WiFi routers and mmWave radars

## EDUCATION

### University of North Carolina at Charlotte (PhD)

Aug 2018—May 2024

- Computer Science, concentration in Machine Learning and Robotics
- Advisor: Dr. Srinivas Akella

### University of North Carolina at Charlotte (MSc)

Aug 2018—May 2021

- Computer Science, concentration in AI, Robotics, and Gaming

- Cumulative GPA: 4.00

**Wichita State University (BSc)**

**Aug 2014—May 2018**

- Computer Science, minor in Mathematics
- Cumulative GPA: 3.45

## TEACHING EXPERIENCE

---

**Teaching Assistant** (University of North Carolina at Charlotte)

**Jan 2021—May 2024**

Taught and mentored graduate students in the following courses

- Machine Learning (ITCS8156)
- Algorithms & Data Structures (ITCS8114)
- Optimization for Machine Learning and Data Science (ITCS8010)

**B.S. Teaching Fellow** (Wichita State University)

**Aug 2016—May 2018**

Co-instructed, graded, and tutored undergraduate students in the following programming classes

- Object-oriented programming (CS311)
- Data structures (CS300)
- Introductory C++ programming (CS211)

## ACTIVITIES/AWARDS

---

**Reviewer**

**Jan 2022—**

- IEEE International Conference on Robotics and Automation (ICRA)
- IEEE International Conference on Intelligent Robots and Systems (IROS)
- IFAC Conference on Control Applications in Marine Systems, Robotics and Vehicles (CAMS)

**UNC Charlotte GSSF Grant Recipient**

**May 2022**

- Awarded the UNC Charlotte Graduate School's Summer Fellowship (GSSF) grant

**Deans Honor Roll**

**May 2018, May 2017, Dec 2016, Dec 2014**

- Recognized for outstanding academic performance by the Dean's office

**Vice President, Association for Computing Machinery (ACM)**

**Aug 2015—Dec 2016**

- Helped to manage the local chapter of ACM and organized educational events on campus

**Vice President, Institute of Electrical and Electronics Engineering (IEEE)**

**Aug 2015—Dec 2016**

- Helped to manage the local chapter of IEEE and organized educational events on campus

## SKILLS

---

**Libraries:** Tensorflow, PyTorch, OpenCV, Robot Operating System (ROS), Pyro, GPFlow, Numpy, Jax

**Languages:** Python, C/C++, Matlab, Bash Scripting

**Platforms:** Linux, Docker, OpenStack, Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP), Slurm
